

Opti-Pro Shop Spray

One of Opti-Pro Shop Spray's many features is its anti-corrosion properties.

Below is an email and picture we received from an Opti-Pro user.

I'm attaching a photo of the mounting bolts on a bell where Interlube's Opti Professional Shop Spray was used on PART of the hardware.

Notice the bolts and washers on the mounting plate. When it was installed approximately three years ago, the bolts and two of the three flat washers were sprayed with Opti. The last washer was not, as my Dad ran out of Opti spray. The top left washer was NOT sprayed with Opti prior to installation, and is now very rusted and corroded. The hardware that WAS sprayed looks brand new. All three washers were exactly the same when brand new. What a contrast!

This is located at my Mom and Dad's along the Little Manatee river just off Tampa Bay, Florida, so it is in a Saltwater environment. It's very difficult to keep anything metal from corroding here. But not with Opti, obviously! Dad has tried EVERYTHING, including WD-40 and lots of lesser known products, but says he has never found ANYTHING that works as well as Interlube's Opti Professional Shop Spray.

The picture is worth a thousand words - The same exact washers, side by side, for over three years in the sun, rain, and salt air. One completely corroded, the others sprayed with Opti three years ago and they look like new!

Just thought you'd like to see what your Interlube products can really do.

Thanks!
Matt

Opti-Pro features:

- Corrosion protection
- Lubricant
- Penetrant
- Water repellent

Use On:

- Power equipment
- Marine applications
- Motorcycles
- Hardware
- Automotive
- Household applications
- Heavy machinery

See what Opti-Pro Shop Spray can do for you.
